**Subject:** Nafion BP2 study

Hi Neil. I am sorry that there is a lot of turmoil right now for you and your lab. Hope things get resolved in your favor soon.

I am submitting the rna samples to the core today so it should not be that long before we get the data back and start to do the analysis. On that end, it would be good to start to compile the dose dependent changes in the phenotypic effects that we can compare the gene expression changes to. I can have Jerry get the data in the right format for the modeling. Is the data ready for us to perform the modeling yet? Also, it is not too early to start putting together the manuscript. Can you share yours yet? Of course I would keep confidential. If all goes well I would like to wrap up the manuscript before the reorg as there are some uncertainties in where I am going.
